THE REAL PROBLEM

Why most businesses struggle

Disconnected tools and manual work quietly drain time, cash flow and management visibility.

Delayed payments

Difficulty tracking outstanding invoices and following up at the right time.

Costly manual errors

Repeated data entry creates mismatches and avoidable financial losses.

Weak stock control

Stock mismatches make purchasing and fulfilment harder to manage.

No real-time access

Offline data delays decisions and keeps teams dependent on one location.

Customer disputes

Weak communication leads to confusion around bills, orders and balances.

Reduced profitability

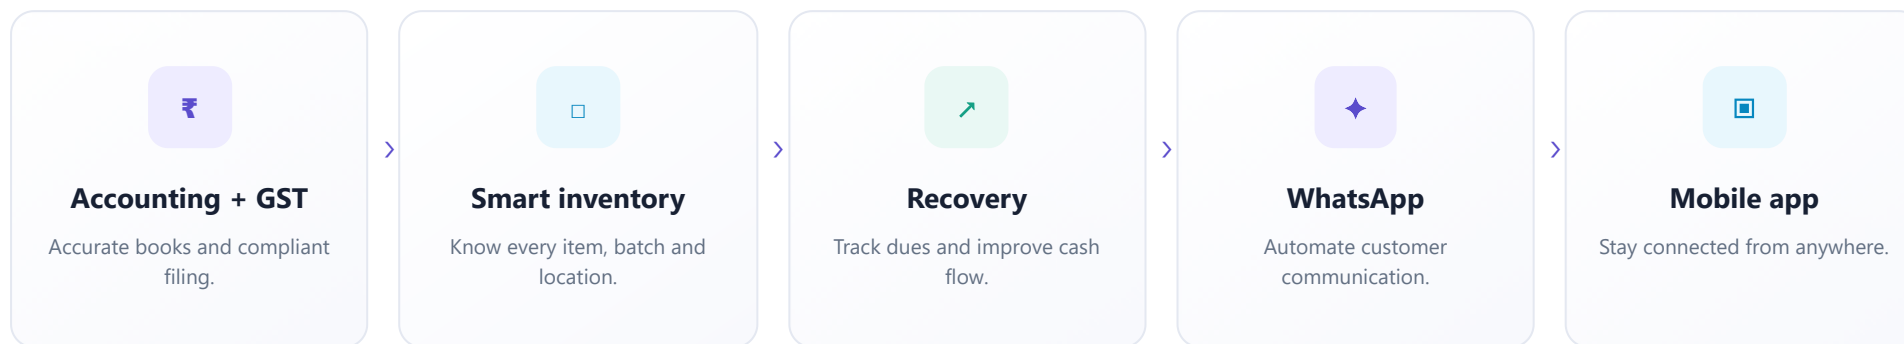

Lost control and slow decisions compound into lower business performance.

The result: less control, slower decisions and reduced profit.

— THE SMART SOLUTION

One ERP. Total business control.

AccountGST brings your essential workflows together in one intelligent, connected system.

A single source of truth for owners, teams and customers.

— COMPLETE ECOSYSTEM

Everything you need in **one platform**

Accounting

Vouchers, ledgers, reconciliation and financial statements.

Inventory

Live stock visibility with item-level control.

GST compliance

GST-ready workflows and direct filing support.

Reports
