CORPORATE CONTROL

One view

Scale

Multi-branch

Insights

Real-time

— THE CHALLENGE

Why most businesses struggle

As operations expand, disconnected systems make control and decision-making harder.

No branch visibility

Leaders lack real-time data across locations.

Outstanding payments

Collections become difficult to prioritise.

Manual losses

Errors reduce financial accuracy and profit.

Stock mismatches

Poor stock control disrupts operations.

Missed opportunities

Orders and enquiries fall through gaps.

Weak communication

Teams operate without shared context.

The result: uncontrolled operations, delayed decisions, customer churn and reduced margins.

— **CONNECTED CONTROL**

One platform. **Complete control.**

AccountGST connects people, approvals, communication and fulfilment.

Roles & accountability

Clarify ownership across teams.

Smart workflows

Structure approvals and hand-offs.

Faster recovery

Improve outstanding collections.

Email & WhatsApp

Integrate business communication.

Order to dispatch

Make fulfilment seamless.

Multi-location growth

Scale with consistent control.

Run your business smarter, faster and with fewer errors.
